Glasses not indicated for direct observation of the sun

RETINA PRO BLUE LIGHT SHIELD GLASSES - WORK AND PLAY

We spend an average of several hours a day in front of a screen to play or work. That's why it's important to protect your eyes every day from the harmful effects of screens: visual fatigue, migraines, sleep disorders ... Spirit of Gamer anti-blue light glasses filter the aggressive blue light of your various screens: Computers, Games consoles, Smart TVs, Tablets .... These are glasses without any correction, but with a special treatment against blue light and anti-glare. The contrasts are thus improved and the brightness of the screens is reduced. The frame is lightweight and the large size of the lenses provides better peripheral vision. Spirit of Gamer gives you close protection of your eyes.

MAINTENANCE TIPS :

Clean your glasses with: a wipe, a microfiber cloth or spray for optics. Avoid paper towels, rags containing silicone, paper tissues that may scratch your glasses! If there are projections on your glasses, never dry them dry: pass them under clear water beforehand ...
