SPIRIT OF GAMER XPERT-K1100 GAMING KEYBOARD

Model: CLA-XK1100

OPTO-MECHANICAL SWITCH

XPERT-K1100 is a high-performance blue opto-mechanical keyboard designed for action! Each key has a laser beam that is blocked at rest by the key. When pressed, the laser then passes through the switch to touch the optical light sensor, then the key is activated! This new technology is about 30% faster than a mechanical keyboard.

ANTI-GHOSTING TECHNOLOGY

Thanks to the technology, XPERT-K1100 integrates the Anti-Ghosting functionality on the entire keyboard. Each keystroke is recorded, regardless of the total number of keys. With Anti-Ghosting technology, you benefit from additional security and can combine key combinations without any flaws!

MULTIFUNCTION SOUND LIGHTS DIALS

With its Multifunction Sound and Light button, you can control the volume and switch to mute in an instant. A long press and you control the backlight, the brightness of its 13 predefined[Rainbow Lights] modes: Wind, Ripple, Shadow, Laser. XPERT-K1100 also has 3 keys[Master], M1 / M2 / M3 / M3 to directly manage your Playlist: previous, play/pause, next. They will also allow you to customize and pre-define your favorite backlight modes.

GAME ON

Its online downloadable software offers 3 Gamer Profiles and will allow you to set up all the keys on your keyboard by assigning: a key combination, a multimedia function or a macro. The software also allows you to customize the LED backlighting of the keys!

MODE PLAY/OFFICE

XPERT-K1100; offers you optimal gaming comfort with its[Game] Mode, which allows you to disable Windows© keys. Thus, no more risk of leaving your game in the middle of a murderous madness with an accidental strike. As for the[Office] mode, it allows you to reactivate the Windows© context menu and benefit from all the keys on your keyboard.

ERGNOMY AND COMFORT

On the design side, XPERT K1100 benefits from a neat finish with its aluminum-coated frame, a removable magnetic wrist rest for extended playing comfort. It is adjustable in height in 1 position and equipped with non-slip silicone pads for even greater stability. With 1.80 meter with gold-plated, braided and protected nylon USB cable, it offers great freedom to set up your setup!
